Summary

Full-Stack Engineer with 3.5 years of experience building scalable, user-friendly SaaS products. Built WisdomCircle from the ground up, scaling from 1K to 130K users and \$1.6M+ revenue. Shipped features like realtime chat, notifications, recommendations, AI recruiter assistants and subscriptions. Strong in JavaScript, TypeScript, Python, Node.js, Next.js, PostgreSQL, AWS and distributed systems.

Experience

WisdomCircle

Tech Lead

Bengaluru, India

Nov 2024 – Present

- **AI Recruitment Assistant:** Designed and shipped WizAI, an in-product assistant that unifies candidate search, profile comparison, outreach drafting and role matching into a single interface. It queries the database based on admin prompts and uses AI to deliver the best output, **cutting time to shortlist by 40%**.
- **Recommendation Engine:** Engineered an OpenAI embedding pipeline with cosine similarity and top-K ranking on PostgreSQL. Also filtered recommendations using user preference matching algorithm that **diminished spam applications by 10%** and **enhanced opportunity targeting by 25%**.
- **Payment & Subscription Management:** Implemented an end-to-end subscription and tier-upgrade management system using NestJS, Stripe and Prisma, automating billing workflows and subscription lifecycle, **increasing revenue by 10% and reducing drop rate by 20%**.
- **Automation Testing:** Engineered and designed project-wide automation testing using Playwright, covering critical application flows such as authentication, community and key user journeys, **cutting release regression bugs by 40%**.
- **Speed Up Release Cycle:** Led end-to-end sprint cycles including task prioritisation, code reviews and PR evaluations. Improved sprint-end testing and **streamlined the release process** using Agile-based sprints, unlocking a weekly ship cadence.
- **Reduce Production Issues:** Assisted in infrastructure maintenance and on-call observability, **resolving production failures by 80%** and ensuring system stability. **Enhanced notification engagement by 20%** by integrating rich media (images, videos) into delivery flows.

WisdomCircle

Full-Stack Software Engineer

Bengaluru, India

Dec 2022 – Nov 2024

- **Platform Scale & Revenue:** Implemented full-stack performance, growth and monetisation optimisations to elevate the platform user base by over 130 times from **1K to 130K users** and drive revenue to **\$1.6M**.
- **Realtime Chat:** Architected the candidate-recruiter realtime chat platform on a WebSocket gateway with Prisma, PostgreSQL and Redis. Enabled edit, delete, read receipts, block and report flows.
- **Notification Center:** Architected and implemented a centralised Notification Center using **Node.js, Vue, Redis and Sockets**, integrating multiple communication channels for real-time and scheduled notifications, **lifting user engagement by 40%**.
- **Social Community Platform:** Created an interactive comment feature for the social community of the platform with replies, likes, edit, report and share options, **increasing usability on the platform by 50%**.
- **Optimise Search:** Optimised search functionality for users and jobs by including degree and college listings, highlighting results, quick filter toggles and **query-based implicit filters** through RESTful API integration, achieving better performance.
- **TypeScript Migration:** Migrated the frontend and backend to strict-mode TypeScript and modernised outdated Vue 2 modules and components to a modular architecture, **resolving 60% of recurring application errors** and improving maintainability.
- **Cron Jobs & Weekly Digest:** Built cron-driven scheduled jobs powering daily and weekly email digests of unread threads and personalised opportunity summaries, improving re-engagement and retention.
- **Video Recording & Streaming:** Implemented a seamless cross-browser video recorder and upload solution for user-generated video introductions using Cloudflare Stream, Next.js and Nuxt.js, enabling the upload and management of user videos.
- **Authentication flow:** Enhanced user authentication by integrating LinkedIn OAuth 2.0, Google one-tap and one-time email-link signup flows, **increasing verified users by 15%**.

Projects

GovSim AI

Multi-agent public-policy evaluator with 8 specialised AI agents, judge agents and MCP tool adapters. (*Next.js, FastAPI, OpenAI, Qdrant*)

InterviewerOS

AI mock interview platform using voice and then gives performance report. (*Next.js, FastAPI, Tailwind, MongoDB*)

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: Vue 3, Nuxt 3, React, Next.js, Redux, Pinia, Tailwind CSS

Backend: Node.js, NestJS, Express, Django, PostgreSQL, MongoDB, Redis, Prisma, WebSockets

Other: Tensorflow, Deep Learning, AWS, Cloudflare, Docker, Playwright, OAuth 2.0, Git

Education

MBM University

B.Tech, Electronics & Communication Engineering. CGPA 8.5 / 10

Jodhpur, India

2018 – 2022
